

# Hocking Hills

1,671 sq. ft.  
3 BR / 2-1/2 BA

The Hocking Hills was designed for those wanting to build on a lakefront or capture a mountain view. The expansive glass in the great room brings the outdoors in and plenty of light. The open timbered cathedral ceiling and the large stone fireplace makes you want to snuggle up with a bowl of popcorn and a favorite book. The kitchen has an adjoining laundry; half bath; and dining area. Master bedroom features its own walk in closet and master bath with room for a garden tub and shower. Upstairs, there are two more bedrooms; a bath and open loft that offers a splendid view of the great room below. Outside there is plenty of deck area when friends are over for a barbecue or to sit out and watch the sunset. This one deserves a second look!

*A full set of blueprints of this plan is available. Photo and floor plans may differ slightly from actual blueprints.*
